

INSPIRE STATE LEVEL EXHIBITION 2011

Wesley Co-Educational High School, Medak division, Medak District, A.P. (25th to 27th June)

WRITE UP OF THE PROJECT / MODEL

Warrant No. APMD100099

**NAME OF THE PROJECT: Production of electricity with the help of salt water
(sea water):**

1. Name of the INSPIRE Awardee : A.Manasa
2. Name of the parent : Sathaiah
3. Class : 7th
4. Name of the School : Upper Primary School
Shivvaipally,
5. Address : MedakMandal
6. Name of the Teacher : D.Krishnamurthy
7. Name of the District & State : Medak, Andhra Pradesh

A Brief Note on the Project

Production of electricity with the help of salt water (sea water): It is a project prepared for the production of Electricity with the help of salt water i.e sea water and Cuppersulphate. Production and procurement of electricity is precious these days. In emergencies, some times we are not in a position to use the electricity due to power failures. It leads disturbances in programmes. Big factories like sugar factories, they are generating the electricity for their benefit. Similarly, we can generate the electricity with the help of sea water and copper sulphate. There is huge natural resource of sea water. With the help of this system, villages near by the seashores can generate the electricity with low cost and need not depend on the government for the power. With this project we can save the electricity.
